

AI Prompt Library for Business

50+ ready-to-use prompts | By Samme Samuel, CoreFlare Agency

How To Use This Library

Every prompt here is finished work. Copy it, swap the **[BRACKETED]** parts for your own details, paste it into Claude or ChatGPT. That is the whole workflow. The prompts are long on purpose: role, context, constraints, and output format are what separate a usable draft from generic filler. If the first output misses, tell the model exactly what was wrong and ask it to revise instead of starting over. Save the ones that work into a doc of your own and you stop writing prompts forever.

Two rules that double your results:

- Fill in every bracket. A vague variable produces vague output. "[TARGET AUDIENCE]" should read "SaaS founders with 5-20 employees doing outbound", not "businesses".
 - Feed it your real material. Paste your actual website copy, your actual email, your actual numbers. The model can only be as specific as the input you give it.
-

Section 1: Marketing

1. Ideal Customer Profile Builder

Use when: you need to sharpen who you sell to before writing any campaign.

You are a B2B market strategist who has built positioning for companies in [YOUR INDUSTRY].

MY BUSINESS: [ONE PARAGRAPH DESCRIBING WHAT YOU SELL AND HOW IT WORKS]

CURRENT CUSTOMERS: [DESCRIBE 3 REAL CUSTOMERS OR CUSTOMER TYPES]

PRICE POINT: [YOUR PRICE OR RANGE]

Build a detailed Ideal Customer Profile. Use this exact structure:

1. FIRMOGRAPHICS: company size, revenue band, industry, geography, growth stage
2. BUYER ROLE: job title, who they report to, what they are measured on
3. TRIGGER EVENTS: 5 specific situations that make this buyer start looking for a solution like mine
4. PAIN HIERARCHY: rank their top 5 problems from most urgent to least, and note which ones I actually solve
5. CURRENT ALTERNATIVES: what they use today, including doing nothing

6. BUYING OBJECTIONS: the 4 real reasons they say no, with the strongest counter to each
7. WHERE THEY ARE: the specific channels, communities, and publications where this person spends attention
8. DISQUALIFIERS: 4 signals that mean I should walk away from this lead

Rules: be specific, not generic. Every claim must be something I could verify by talking to 5 customers. If you are inferring rather than reasoning from what I gave you, mark the line with (assumption). Do not invent statistics.

2. Offer Positioning Statement

Use when: your messaging sounds like everyone else's and you need a sharper angle.

You are a positioning consultant. Your job is to find the sharpest true angle for my offer, not the safest one.

OFFER: [WHAT YOU SELL]

TARGET AUDIENCE: [WHO IT IS FOR]

MAIN COMPETITORS: [LIST 3 AND WHAT THEY CLAIM]

WHAT MAKES MINE DIFFERENT: [YOUR HONEST ANSWER, EVEN IF IT IS SMALL]

Produce:

A) THREE POSITIONING ANGLES. For each: a one-sentence positioning statement, the specific competitor claim it attacks, who it repels (this is required), and why it is defensible.

B) A RECOMMENDATION. Pick one angle. Give me three reasons and one risk.

C) THE MESSAGING KIT for the winning angle:

- Headline (under 10 words)
- Subhead (under 25 words)
- Three proof points I would need to support it (tell me what proof to gather, do not invent proof)
- One sentence I should stop saying immediately

Voice: short declarative sentences. No corporate filler. No "leverage", "seamless", "solutions", "empower". If an angle only works with fake claims, say so and discard it.

3. Landing Page Copy, Full Draft

Use when: you need a complete conversion page and not a pile of headline options.

You are a direct response copywriter. Write a complete landing page.

OFFER: [WHAT YOU ARE SELLING OR GIVING AWAY]

AUDIENCE: [WHO LANDS ON THIS PAGE AND WHAT THEY WERE DOING RIGHT BEFORE]

TRAFFIC SOURCE: [E.G. COLD LINKEDIN ADS / GOOGLE SEARCH / EMAIL LIST]

PRIMARY ACTION: [BOOK A CALL / BUY / DOWNLOAD]

PRICE: [PRICE OR "FREE"]

PROOF I ACTUALLY HAVE: [LIST REAL TESTIMONIALS, NUMBERS, LOGOS. WRITE "NONE" IF NONE]

Write in this order, labeling each block:

1. HERO: headline, subhead, CTA button text
2. PROBLEM: 3 short paragraphs naming the reader's current situation in their own words
3. SOLUTION: how the offer works, in 3 steps
4. OUTCOME: 5 bullets, each a concrete result, no adjectives-only bullets
5. PROOF: use only the proof I listed. If I listed none, write a placeholder line telling me exactly what proof to collect.
6. OBJECTION HANDLING: 4 questions and answers written as the reader would ask them
7. OFFER RECAP: what they get, what it costs, what happens after they click
8. FINAL CTA: two lines plus button text

Rules: 8th-grade reading level. Sentences under 20 words. Never invent a statistic, client name, or result. Do not use "in today's fast-paced world" or any variant.

4. Email Nurture Sequence Architect

Use when: leads come in and then go cold because nothing follows.

You are a lifecycle email strategist. Design and write a 7-email nurture sequence.

ENTRY POINT: [HOW THE LEAD ENTERED, E.G. DOWNLOADED A CHECKLIST]

AUDIENCE: [WHO THEY ARE]

END GOAL: [BOOK A CALL / BUY / REPLY]

MY OFFER: [WHAT YOU EVENTUALLY WANT THEM TO TAKE]

SENDING WINDOW: [E.G. OVER 14 DAYS]

For each of the 7 emails give me:

- Send day
- Job of this email in one sentence
- Subject line, plus one alternate
- Preview text
- Full body copy, 120-200 words, written to be read on a phone
- The single CTA

Sequence logic to follow: email 1 delivers the promised asset and sets expectations. Emails 2-4 build belief by teaching one useful thing each, no pitch. Email 5 introduces the offer through a relevant scenario. Email 6 handles the biggest objection directly. Email 7 is a clean close with a reason to act now that is honest.

Voice: first person, plain, direct. No emojis. No fake urgency. Do not fabricate case studies or numbers. Where a story or result belongs, insert [INSERT YOUR EXAMPLE HERE] with a note on what kind of example fits.

5. Paid Ad Variant Generator

Use when: you need real test variants instead of the same ad reworded five times.

You are a performance marketer who writes ads for [PLATFORM: FACEBOOK / LINKEDIN / GOOGLE].

PRODUCT: [WHAT IT IS]

AUDIENCE: [TARGETING DESCRIPTION]

OFFER: [THE CLICK-THROUGH OFFER]

LANDING PAGE PROMISE: [WHAT THE PAGE SAYS]

Write 8 ad variants. Each must use a DIFFERENT angle, not different wording of the same angle. Use these angles: problem-agitate, direct outcome, contrarian take, objection-first, before/after, question hook, specific mechanism, cost of inaction.

For each variant output:

ANGLE: [name]

PRIMARY TEXT: [platform-appropriate length]

HEADLINE: [under 40 characters]

DESCRIPTION: [under 30 words]

VISUAL DIRECTION: [one sentence describing the image or video concept]

WHAT THIS TESTS: [the specific hypothesis]

Then rank all 8 by expected click-through for this audience and explain the top pick in two sentences.

Constraints: no claims I cannot back up, no earnings promises, no invented stats, nothing that would trip ad policy review.

6. Competitor Teardown

Use when: you want to know exactly where a competitor is weak before you position against them.

You are a competitive analyst. Tear down this competitor's marketing.

COMPETITOR: [NAME]

THEIR COPY: [PASTE THEIR HOMEPAGE OR SALES PAGE TEXT HERE]

THEIR PRICING: [IF KNOWN, ELSE "UNKNOWN"]

MY OFFER: [DESCRIBE YOURS]

Analyze and output:

1. THEIR CORE PROMISE, in one sentence, in their words
2. WHO THEY ARE BUILT FOR, based only on the copy
3. THEIR PROOF STRATEGY: what kind of evidence they lean on
4. THREE STRENGTHS I should not try to fight head-on
5. THREE GAPS: things they do not address, audiences they ignore, objections they dodge
6. THE WEDGE: the single best opening for me, with the exact sentence I would lead with
7. WHAT TO COPY: two structural things they do well that I should adopt

Base everything strictly on the text I pasted. If you do not have enough information for a section, say

"insufficient information" rather than guessing. Do not speculate about their revenue, headcount, or results.

7. Lead Magnet Concept Generator

Use when: you need a giveaway people actually want, not another generic ebook.

You are a demand generation strategist.

AUDIENCE: [WHO YOU WANT ON YOUR LIST]

THEIR MOST URGENT PROBLEM: [BE SPECIFIC]

MY PAID OFFER: [WHAT YOU SELL AFTER]

MY DELIVERY CAPABILITY: [E.G. I CAN MAKE PDFS, SHEETS, SHORT VIDEOS, NOTION TEMPLATES]

Generate 10 lead magnet concepts. For each:

TITLE: the actual title I would put on it

FORMAT: what it physically is

THE PROMISE: what the reader can do after consuming it, in one sentence

TIME TO CONSUME: realistic estimate

TIME FOR ME TO BUILD: realistic estimate

BRIDGE TO MY OFFER: the natural next step it creates

WHY THEY WOULD TRADE AN EMAIL FOR IT: one sentence

Rules: no generic "ultimate guide to [topic]" concepts. Every magnet must solve one narrow problem completely rather than survey a broad one. Rank the 10 by (value to reader) divided by (build effort) and tell me which three to build first.

8. Brand Voice Codifier

Use when: you want AI and your team writing in your voice consistently.

You are a brand voice analyst.

Below are 5 samples of writing that sound like my brand:

SAMPLE 1: [PASTE]

SAMPLE 2: [PASTE]

SAMPLE 3: [PASTE]

SAMPLE 4: [PASTE]

SAMPLE 5: [PASTE]

Produce a brand voice guide I can paste into any AI prompt as a style instruction:

1. VOICE IN THREE ADJECTIVES, each with a one-line definition of what it means in practice
2. SENTENCE PATTERNS: typical length, rhythm, how I open and close
3. VOCABULARY: 15 words and phrases I use, 15 I never use
4. POINT OF VIEW: pronouns, formality, how I refer to the reader

5. HOW I HANDLE: claims, numbers, humor, disagreement
6. THE DO-NOT LIST: 8 specific things that would immediately sound wrong
7. A COPY-PASTE STYLE BLOCK: a compact paragraph I can drop into any prompt to enforce this voice
8. A CALIBRATION TEST: rewrite this sentence in my voice – "We help businesses improve their operations using technology."

Work only from the samples. Do not import generic brand-voice advice.

9. Webinar or Workshop Outline

Use when: you are running a live session and need a structure that converts without being sleazy.

You are a webinar strategist. Build a 45-minute live session outline.

TOPIC: [TOPIC]

AUDIENCE: [WHO REGISTERS]

WHAT THEY BELIEVE NOW: [THE MISTAKEN OR INCOMPLETE BELIEF]

WHAT THEY MUST BELIEVE TO BUY: [THE SHIFT]

MY OFFER AT THE END: [WHAT YOU PITCH, OR "NO PITCH"]

Output:

1. TITLE plus two alternates, each promising a specific outcome
2. REGISTRATION PAGE BULLETS: 5 bullets, each a specific thing they will learn
3. MINUTE-BY-MINUTE OUTLINE across 45 minutes, with the purpose of each block
4. THE THREE TEACHING BLOCKS: for each, the single idea, the demonstration or example, and the belief it installs
5. TRANSITION TO OFFER: the exact words that move from teaching to offer without whiplash
6. OFFER BLOCK: what to say, in what order
7. Q&A PREP: the 8 questions most likely to be asked and short answers
8. FOLLOW-UP EMAIL: sent 1 hour after, 150 words

Teach real content in the teaching blocks. Do not build the session so the only way to get value is to buy.

10. Marketing Campaign Retrospective

Use when: a campaign just ended and you want lessons, not a report nobody reads.

You are a growth analyst running a post-campaign review. Be blunt.

CAMPAIGN: [WHAT IT WAS]

GOAL: [THE NUMBER YOU WANTED]

RESULT: [THE NUMBER YOU GOT]

SPEND: [BUDGET AND TIME INVESTED]

FUNNEL DATA: [PASTE YOUR ACTUAL NUMBERS: IMPRESSIONS, CLICKS, LEADS, CALLS, SALES]

WHAT I THINK WENT WRONG: [YOUR HYPOTHESIS]

Produce:

1. FUNNEL MATH: conversion rate at each step, and which single step is the bottleneck
2. VERDICT on my hypothesis: agree, disagree, or partly, with reasoning from the numbers
3. THREE ALTERNATIVE EXPLANATIONS I have not considered
4. WHAT THE DATA CANNOT TELL US: be explicit about the limits of this dataset
5. THE ONE FIX with the highest expected impact, and how I would test it for under [BUDGET]
6. KILL OR CONTINUE: a straight recommendation with your reasoning
7. THREE THINGS TO INSTRUMENT before the next campaign so this review is easier

Use only the numbers I provided. Do not compare to industry benchmarks unless I supply them. If a number looks wrong or inconsistent, flag it.

Section 2: Sales & Outreach

11. Cold Email That Earns A Reply

Use when: you are starting outbound to a new segment and need a first sequence.

You are a cold email specialist. Deliverability and reply rate are the only things you optimize for.

WHO I AM: [YOU AND YOUR COMPANY IN ONE LINE]

WHAT I DO: [THE SPECIFIC OUTCOME YOU CREATE]

TARGET: [JOB TITLE, COMPANY TYPE, SIZE]

THE TRIGGER: [WHY I AM REACHING OUT TO THEM NOW, E.G. THEY ARE HIRING SDRs]

PROOF I ACTUALLY HAVE: [REAL RESULTS OR "NONE YET"]

CALL TO ACTION: [WHAT YOU ASK FOR]

Write a 4-email sequence:

Email 1 (day 1): under 90 words. Personalized opener tied to the trigger, one line on the problem, one line on what I do, soft CTA question.

Email 2 (day 4): new angle, not a bump. Under 70 words.

Email 3 (day 9): share one specific insight or observation with no ask beyond a question. Under 80 words.

Email 4 (day 15): clean breakup. Under 50 words.

For each email give: subject line (3-5 words, lowercase, no punctuation), body, and the CTA.

Hard rules: no "I hope this email finds you well", no "quick question" subject lines, no paragraph over 2 sentences, no links in email 1, no attachments, no merge tag beyond [FIRST NAME] and [COMPANY]. If I said I have no proof, do not invent any. Write at a level a busy person skims in 8 seconds.

12. LinkedIn Connection And Follow-Up

Use when: you are building a pipeline through LinkedIn instead of email.

You are a social selling expert. Write a LinkedIn outreach flow that does not feel like a pitch bot.

MY POSITIONING: [ONE LINE]

TARGET PERSON: [TITLE AND COMPANY TYPE]

THEIR LIKELY PRIORITIES THIS QUARTER: [YOUR BEST GUESS, BE SPECIFIC]

WHAT I WANT: [A CALL / A REPLY / A REFERRAL]

Produce:

1. CONNECTION REQUEST NOTE: under 200 characters, no pitch, gives a reason
2. MESSAGE 1 (2 days after they accept): under 60 words, opens a conversation, asks nothing about buying
3. MESSAGE 2 (5 days later, if they replied): moves toward the real topic, under 80 words
4. MESSAGE 2-ALT (5 days later, if silence): different angle, under 50 words
5. MESSAGE 3: the ask, under 60 words, with a specific low-friction next step
6. COMMENT SCRIPTS: 3 example comments I could leave on their posts that make the later message land better

Rules: no "I noticed you..." openers, no compliments about their profile, no voice-note requests, no pitching in the connection note. Write like a peer, not a vendor.

13. Discovery Call Script

Use when: your calls wander and you leave without knowing if the deal is real.

You are a sales trainer. Build me a 30-minute discovery call script.

WHAT I SELL: [OFFER]

TYPICAL DEAL SIZE: [AMOUNT OR RANGE]

WHO I TALK TO: [TITLE]

WHAT DISQUALIFIES A PROSPECT: [YOUR CRITERIA]

Output:

1. OPENING (2 min): the exact words to set the agenda and get permission
2. SITUATION QUESTIONS (5 min): 5 questions, each with the reason I am asking it
3. PROBLEM QUESTIONS (8 min): 6 questions that surface pain, ordered from surface to deep, plus the follow-up probe for each
4. IMPACT QUESTIONS (5 min): 4 questions that get them to quantify the cost of the problem in their own numbers
5. DECISION QUESTIONS (4 min): budget, authority, timeline, and what happens if they do nothing – phrased so they do not feel interrogated
6. TRANSITION (3 min): how to move to next steps, with two branches, qualified and not qualified
7. CLOSE (3 min): the exact next-step ask
8. RED FLAG LIST: 6 things a prospect might say that mean I should disqualify
9. A ONE-PAGE CHEAT SHEET version of all of the above

Keep every question open-ended. No leading questions that put words in their mouth. No manufactured urgency.

14. Objection Handling Playbook

Use when: the same objections keep killing deals and you improvise every time.

You are a sales coach. Build an objection handling playbook.

MY OFFER: [WHAT YOU SELL AND THE PRICE]

BUYER: [WHO DECIDES]

OBJECTIONS I ACTUALLY HEAR: [LIST THEM VERBATIM]

For each objection I listed, and then for 5 more you predict, give me:

OBJECTION: the words they use

WHAT IT USUALLY MEANS: the real concern underneath

CLARIFYING QUESTION: what I ask before answering

RESPONSE: 3-5 sentences, spoken language, no jargon

PROOF NEEDED: what evidence would settle it (tell me what to gather, do not invent it)

IF THEY PUSH BACK AGAIN: the second-line response

WHEN TO STOP: the point where I should accept the no and move on

Then give me:

- The 3 objections I should prevent earlier in the sales process, and where to address them
- One thing in my current pitch that is probably causing objection #1

Never use manipulation, false scarcity, or guilt. If an objection is legitimate and I should lose the deal, say so.

15. Proposal Writer

Use when: you need to send a proposal today and want it to close, not just inform.

You are a proposal writer for service businesses. Write a proposal that a busy buyer can approve in 5 minutes.

CLIENT: [COMPANY AND CONTACT]

WHAT THEY TOLD ME ON THE CALL: [PASTE YOUR NOTES VERBATIM]

WHAT I AM PROPOSING: [SCOPE]

PRICE AND TERMS: [AMOUNT, PAYMENT SCHEDULE]

TIMELINE: [DURATION AND KEY DATES]

WHAT I NEED FROM THEM: [ACCESS, APPROVALS, MATERIALS]

Structure:

1. THE SITUATION: their problem restated in their own words from my notes, 100 words max
2. THE OUTCOME: what is true when this is done, in specific terms
3. THE APPROACH: phases, with deliverables under each. Name each phase plainly.
4. WHAT IS NOT INCLUDED: an explicit out-of-scope list
5. TIMELINE: table format, phase / deliverable / date
6. INVESTMENT: price, what triggers each payment

7. WHAT I NEED FROM YOU: bulleted, with dates
8. NEXT STEP: one action, one link, one deadline

Rules: no methodology jargon, no company boilerplate, no "about us" section, no filler pages. Use only what is in my notes. Where a proof point or case study belongs, write [INSERT RELEVANT EXAMPLE] rather than inventing one. Total length under 900 words.

16. Follow-Up After Silence

Use when: a hot prospect went dark and "just checking in" is not going to work.

You are a sales rep who is good at reviving dead deals without being annoying.

CONTEXT: [WHAT STAGE THE DEAL REACHED]

LAST CONTACT: [WHAT WAS SAID AND WHEN]

DAYS OF SILENCE: [NUMBER]

WHAT THEY WANTED: [THEIR STATED GOAL]

WHAT MIGHT HAVE CHANGED: [BUDGET FREEZE / PRIORITY SHIFT / THEY WENT WITH SOMEONE ELSE / UNKNOWN]

Write 4 different follow-up messages, each under 80 words, each using a different mechanism:

A) THE VALUE DROP: send something useful, ask nothing

B) THE STATUS QUESTION: make it easy to say the deal is dead

C) THE NEW INFORMATION: a genuine reason to resurface, tell me what info I would need to supply

D) THE CLEAN CLOSE: permission to stop following up

For each, note the situation it fits best and when to send it in the sequence.

Rules: no guilt, no "did you get my last email", no fake urgency, no "circling back", no "bumping this to the top of your inbox". Every message must give the prospect an easy way out.

17. Referral Request

Use when: you have happy clients and no system for turning them into pipeline.

You are a client relationships strategist.

MY CLIENT: [NAME AND WHAT I DID FOR THEM]

RESULT THEY GOT: [SPECIFIC, OR "TOO EARLY TO SAY"]

RELATIONSHIP QUALITY: [WARM / TRANSACTIONAL / FORMAL]

WHO I WANT INTRODUCED TO: [DESCRIBE THE IDEAL REFERRAL PRECISELY]

Produce:

1. TIMING: the best moment in a client relationship to ask, and why now is or is not it
2. THE ASK, three versions: email, in a call, and a message after a win. Each under 120 words.
3. THE SPECIFICITY UPGRADE: rewrite "do you know anyone who needs this" into an ask so specific the client can immediately picture a person
4. THE FORWARDABLE BLURB: 60 words my client can copy and paste to their contact, written in their voice

not mine

5. IF THEY SAY NO OR GO QUIET: how to respond without damaging the relationship

6. THE SYSTEM: how to make this a repeatable step in my delivery process, with the exact trigger point

Never offer money in a way that would make the referral feel bought unless I ask for that. Do not overpromise on the client's behalf.

18. Pricing Conversation Prep

Use when: you know you undercharge and want to hold the number.

You are a pricing coach. Prepare me for a pricing conversation.

WHAT I DELIVER: [SCOPE]

MY CURRENT PRICE: [AMOUNT]

PRICE I WANT TO CHARGE: [AMOUNT]

CLIENT'S BUSINESS: [WHAT THEY DO AND ROUGH SIZE]

WHAT THIS WORK IS WORTH TO THEM: [YOUR HONEST ESTIMATE AND HOW YOU GOT THERE]

MY FEAR: [WHAT YOU ARE ACTUALLY WORRIED ABOUT]

Output:

1. VALUE FRAME: how to present price relative to what the work produces for them, in one paragraph I can say out loud
2. THE DELIVERY SCRIPT: exactly how to state the number. Include where to pause.
3. THE SILENCE RULE: what to do in the seconds after saying the number
4. THREE PUSHBACK SCENARIOS with responses: "that's more than we expected", "can you do it for less", "we got a cheaper quote"
5. WHAT I CAN TRADE instead of discounting: 5 levers (scope, timeline, payment terms, access, commitment length)
6. MY WALKAWAY: help me define the number below which I should decline, and the sentence to decline gracefully
7. A REALITY CHECK on my fear: is it grounded or not, based on what I told you

Do not tell me to just charge more without giving me the words. Do not invent market rate data.

19. Sales Call Note Summarizer

Use when: you finish a call and need CRM-ready notes plus a follow-up in two minutes.

You are a sales operations assistant. Turn this raw call transcript or notes into structured output.

TRANSCRIPT OR NOTES:

[PASTE EVERYTHING HERE, MESSY IS FINE]

MY OFFER: [WHAT YOU SELL]

Produce exactly these blocks:

CRM SUMMARY (under 120 words, factual, no interpretation)

QUALIFICATION

- Problem, in their words:
- Impact they described:
- Budget signals:
- Decision process and other stakeholders:
- Timeline:
- Competing options mentioned:

QUOTES WORTH KEEPING: 3 verbatim lines that reveal what they care about

RISKS: 3 things that could kill this deal, based on what was said

NEXT STEPS: each as owner / action / date

FOLLOW-UP EMAIL: 150 words, recaps what I heard, confirms next step, no pitch

GAPS: what I failed to ask and should ask next time

Rule: everything must trace to something in the transcript. If a field has no evidence, write "not discussed". Do not infer budget or authority from tone.

20. Win-Loss Analysis

Use when: you want to know why you are really losing deals.

You are a revenue analyst. Find the pattern in my closed deals.

CLOSED-WON DEALS: [FOR EACH: SOURCE, INDUSTRY, SIZE, PRICE, SALES CYCLE LENGTH, WHY THEY BOUGHT]

CLOSED-LOST DEALS: [FOR EACH: SOURCE, INDUSTRY, SIZE, QUOTED PRICE, WHERE IT DIED, STATED REASON]

Analyze and produce:

1. THE WIN PROFILE: the traits shared by deals I close, ranked by how strongly they correlate
2. THE LOSS PROFILE: same for deals I lose
3. STAGE ANALYSIS: where in the process deals die most often
4. STATED VS LIKELY REASONS: for each common loss reason, what buyers say versus what probably happened
5. SOURCE QUALITY: which lead sources produce wins and which waste my time
6. THREE CHANGES to my process, ranked by expected impact, each with the specific action
7. THE DISQUALIFICATION RULE: one rule that would have saved me the most wasted effort

Be honest about sample size. If I gave you too few deals to draw a conclusion, say which conclusions are unsafe. Do not fill gaps with industry assumptions.

Section 3: Content Creation

21. Content Pillar System

Use when: you post randomly and want a repeatable content engine instead.

You are a content strategist.

MY POSITIONING: [ONE LINE]

AUDIENCE: [WHO YOU WANT TO REACH]

WHAT I WANT THEM TO BELIEVE: [THE CORE IDEA]

PLATFORMS: [WHERE YOU POST]

MY UNFAIR ADVANTAGE: [EXPERIENCE, ACCESS, OR PERSPECTIVE OTHERS DO NOT HAVE]

POSTING CAPACITY: [POSTS PER WEEK, REALISTICALLY]

Build a content system:

1. FOUR PILLARS. For each: the pillar name, the belief it builds, the percentage of my posting mix, and why it matters to my audience.
2. TWENTY POST CONCEPTS, five per pillar. Each as: hook line + the specific angle + the format (text, carousel, video, case breakdown).
3. THE SIGNATURE FORMAT: one repeatable post structure I can run weekly that becomes recognizable.
4. A FOUR-WEEK CALENDAR mapping concepts to days based on my capacity.
5. THE RECYCLE RULE: how each piece becomes 3 more pieces across platforms.

Rules: every concept must come from something I could actually speak to given my advantage. No trend-chasing concepts. No "5 tips for X" unless the 5 tips are genuinely non-obvious.

22. Long-Form Article Draft

Use when: you need a real article with structure, not 900 words of throat-clearing.

You are a subject-matter writer, not a content mill. Write a full article.

TOPIC: [TOPIC]

READER: [WHO THEY ARE AND WHAT THEY ALREADY KNOW]

WHAT THEY SHOULD BE ABLE TO DO AFTER READING: [SPECIFIC CAPABILITY]

MY POSITION ON THIS TOPIC: [YOUR ACTUAL OPINION, INCLUDING WHAT YOU DISAGREE WITH]

LENGTH: [WORD COUNT]

SOURCE MATERIAL: [PASTE YOUR NOTES, EXPERIENCE, OR RESEARCH – OR WRITE "NONE"]

Write:

- Title plus two alternates
- Opening: 3 sentences that state the problem and the promise. No preamble, no "in this article we will".
- Body: sections with descriptive H2s. Each section teaches one thing and includes a concrete example, a specific step, or a decision rule.
- One section that argues against the common advice, using my stated position
- A "how to actually do this" section with numbered steps
- Closing: what to do first, in one paragraph

Rules: no filler transitions, no summary paragraph that repeats what you just said, no "it's important to note". Write short paragraphs. If a claim needs evidence I did not provide, write [SOURCE NEEDED] instead of inventing a statistic or study.

23. Short-Form Video Script

Use when: you need TikTok, Reels, or Shorts scripts that hold attention past second three.

You are a short-form video writer for [PLATFORM].

TOPIC: [WHAT YOU ARE TEACHING OR SHOWING]

AUDIENCE: [WHO YOU WANT WATCHING]

LENGTH: [30 / 45 / 60 SECONDS]

FORMAT: [TALKING HEAD / SCREEN RECORDING / VOICEOVER OVER B-ROLL]

MY GOAL: [FOLLOWERS / PROFILE CLICKS / COMMENTS]

Write 3 complete scripts. Each with:

HOOK: the first 3 seconds, written to be spoken, that makes scrolling past feel like a loss

ON-SCREEN TEXT for the hook

BODY: the spoken script with timestamps, in short spoken sentences

VISUAL NOTES: what is on screen at each beat

CTA: one line, not "follow for more"

CAPTION: for the post

WHY THIS HOOK WORKS: one sentence

Rules: write for the ear, not the page. Contractions, fragments, no lists read aloud as lists. The first line cannot be "hey guys" or a greeting of any kind. Do not promise a result you cannot deliver in the video itself.

24. LinkedIn Post From A Raw Idea

Use when: you have a thought worth sharing and 10 minutes to publish it.

You are a LinkedIn ghostwriter for operators, not influencers.

MY RAW IDEA: [BRAIN-DUMP IT HERE, UNPOLISHED, AS LONG AS YOU WANT]

MY AUDIENCE: [WHO FOLLOWS ME]

THE POINT I WANT TO LAND: [ONE SENTENCE]

Write 3 versions of the same post, each using a different structure:

A) STORY: something that happened, what it taught, what it means for the reader

B) CONTRARIAN: the common belief, why it is wrong, what to do instead

C) TEARDOWN: a specific thing broken into steps or components

Each version must have:

- A first line under 12 words that works as the preview
- A second line that earns the "see more" click

- Line breaks every 1-2 sentences
- A specific detail, number, or example from my raw idea
- A closing line that invites a real reply, not "what do you think?"
- Under 250 words

Rules: no emoji bullets, no "agree?", no rags-to-riches framing, no invented anecdotes. Everything must come from my raw idea. If my idea is too thin to support a post, tell me what detail is missing.

25. Newsletter Issue

Use when: your newsletter needs to be worth opening every time.

You are a newsletter writer.

NEWSLETTER: [NAME AND WHAT IT PROMISES]

AUDIENCE: [WHO SUBSCRIBES AND WHY]

THIS ISSUE'S TOPIC: [TOPIC]

MY MATERIAL: [PASTE NOTES, LINKS, OBSERVATIONS, OR THIS WEEK'S EXPERIENCE]

LENGTH: [WORD COUNT]

CTA: [WHAT YOU WANT THEM TO DO, OR "NONE THIS ISSUE"]

Write the full issue:

- Subject line plus two alternates, under 45 characters each
- Preview text
- Opening: get to the point in the first sentence
- Main section: the core idea with one worked example
- A practical takeaway section: what the reader does this week, specifically
- One short section that is a genuine aside, recommendation, or observation
- Sign-off and CTA

Voice: first person, conversational, like writing to one person I respect. Short paragraphs. Specific over clever. No "hope you're having a great week". No recap of what you are about to say. Everything must be grounded in my material.

26. Content Repurposing Engine

Use when: one good piece should be feeding your feed for two weeks.

You are a content repurposing specialist.

SOURCE PIECE: [PASTE THE FULL ARTICLE, TRANSCRIPT, OR POST]

MY PLATFORMS: [LIST THEM]

AUDIENCE: [WHO CONSUMES IT]

Extract and produce:

1. THE ATOMIC IDEAS: every distinct idea in the source, listed separately. Do not merge them.
2. For each platform I listed, produce native content, not reformatted copy:

- LinkedIn: 3 posts, each from a different atomic idea, full text
 - X/Twitter: 2 threads, 6-8 posts each, full text
 - Short video: 2 scripts, 30 seconds each, with hooks
 - Email: 1 issue, 200 words
 - Carousel: 1 concept with the text for each of 8 slides
3. THE QUOTE CARDS: 5 pull quotes worth designing
 4. THE SCHEDULE: how to space these over 14 days without it feeling repetitive

Rule: each piece must stand alone. Someone who saw the original should still get value. Do not add facts, numbers, or claims that are not in the source.

27. SEO Content Brief

Use when: you or a writer is about to produce a page that needs to rank.

You are an SEO content strategist. Write a brief a writer could execute without asking questions.

TARGET KEYWORD: [KEYWORD]

SEARCH INTENT AS I UNDERSTAND IT: [INFORMATIONAL / COMMERCIAL / TRANSACTIONAL / NAVIGATIONAL]

MY BUSINESS: [WHAT YOU SELL]

COMPETING PAGES: [PASTE TITLES AND KEY HEADINGS OF TOP RESULTS, OR "UNKNOWN"]

WORD COUNT TARGET: [NUMBER]

Produce:

1. INTENT ANALYSIS: what the searcher actually wants, and what "done" looks like for them
2. TITLE TAG (under 60 characters) and META DESCRIPTION (under 155)
3. URL SLUG
4. FULL H2/H3 OUTLINE with a one-line instruction under each heading describing what to cover
5. QUESTIONS TO ANSWER: 8 questions the page must answer explicitly
6. ENTITIES AND SUBTOPICS to include for topical coverage
7. INTERNAL LINK TARGETS: what kinds of pages to link to and from
8. THE DIFFERENTIATOR: one thing this page will have that the competing pages do not
9. CTA PLACEMENT: where and what

Rules: do not stuff the keyword. Do not recommend a word count higher than the topic supports. If I marked competing pages unknown, note which parts of the brief are less reliable as a result.

28. Case Study From Client Notes

Use when: you did great work and have nothing written up to prove it.

You are a case study writer. Accuracy matters more than drama.

CLIENT: [NAME OR "ANONYMIZED AS: A [INDUSTRY] COMPANY"]

THEIR SITUATION BEFORE: [WHAT WAS BROKEN, IN DETAIL]

WHAT I DID: [YOUR ACTUAL WORK, STEP BY STEP]

TOOLS USED: [LIST]

RESULTS: [ONLY REAL NUMBERS YOU CAN VERIFY. WRITE "QUALITATIVE ONLY" IF YOU HAVE NO NUMBERS]

CLIENT QUOTE: [VERBATIM, OR "NONE"]

TIMEFRAME: [HOW LONG IT TOOK]

Write the case study:

1. HEADLINE: outcome-focused, using only real results
2. AT A GLANCE: client, challenge, approach, result in 4 short lines
3. THE PROBLEM: 150 words, written from the client's point of view
4. WHY IT WAS HARD: the constraint that made this non-trivial
5. THE APPROACH: numbered phases with what was built or changed in each
6. THE RESULT: only the numbers I gave you, with the measurement period stated
7. WHAT I WOULD DO DIFFERENTLY: one honest paragraph
8. WHO THIS APPLIES TO: the reader who should see themselves in this

Absolute rule: invent nothing. No rounded-up numbers, no implied results, no "significant improvement" where I gave no data. If results are qualitative only, write it that way and make the process the proof.

29. Headline And Hook Machine

Use when: the piece is written and the title is doing it no favors.

You are a headline specialist.

THE CONTENT: [PASTE IT, OR SUMMARIZE IN 3 SENTENCES]

PLATFORM: [WHERE IT PUBLISHES]

AUDIENCE: [WHO SEES IT]

THE ONE THING THEY GET FROM IT: [SPECIFIC OUTCOME]

Generate 20 headlines across these mechanisms, labeled:

- Specific outcome (3)
- Contrarian (3)
- Curiosity gap that the content actually closes (3)
- How-to with a constraint, e.g. time or budget (3)
- Mistake or warning (3)
- Question (2)
- Plain and direct (3)

Then:

- A) Cut it to the 5 best and explain each pick in one line
- B) Name the single strongest and say why
- C) Flag any headline that overpromises relative to the content – I would rather lose a click than lose trust

Rules: no clickbait the content does not deliver. No numbers I did not give you. No "you won't believe".

30. Editing Pass On Your Own Draft

Use when: you wrote something and it feels flabby but you cannot see why.

You are a ruthless line editor. Your job is to make this shorter and sharper without changing what it means.

MY DRAFT:

[PASTE IT]

TARGET AUDIENCE: [WHO READS IT]

GOAL OF THE PIECE: [WHAT IT SHOULD ACCOMPLISH]

Do four passes and show each:

PASS 1 – STRUCTURE: does the piece open in the right place? Is anything out of order? Should anything be cut entirely? List specific cuts with paragraph references.

PASS 2 – LINE EDIT: return the full edited text with changes made. Cut filler, tighten sentences, kill hedging, remove adverbs that add nothing, replace vague words with specific ones.

PASS 3 – WEAK SPOTS: list every claim that is unsupported, every sentence that could mean two things, and every place I told instead of showed.

PASS 4 – THE SUMMARY: word count before and after, the three most impactful changes you made, and one thing about my writing I should fix permanently.

Do not add new ideas. Do not make it more formal. Preserve my voice – if my draft uses short punchy sentences, keep them short and punchy.

Section 4: Operations & Admin

31. Standard Operating Procedure Writer

Use when: a task lives only in your head and needs to live in a document.

You are an operations documentation specialist. Write an SOP a new hire could follow on day one without asking a question.

PROCESS: [WHAT THE PROCESS IS]

WHO PERFORMS IT: [ROLE AND SKILL LEVEL]

HOW OFTEN: [FREQUENCY]

TOOLS INVOLVED: [LIST]

HOW I DO IT NOW: [DESCRIBE IT MESSILY, IN THE ORDER YOU THINK OF THINGS]

WHAT GOES WRONG: [KNOWN FAILURE POINTS]

Produce:

1. PURPOSE: one sentence on why this process exists

2. TRIGGER: exactly what starts this process
3. PREREQUISITES: access, tools, and information needed before starting
4. STEPS: numbered, one action per step, each starting with a verb. Include what the person should see after each step.
5. DECISION POINTS: where the process branches, phrased as if/then
6. QUALITY CHECK: how the performer verifies they did it right
7. FAILURE MODES: for each thing I said goes wrong, the cause and the fix
8. ESCALATION: when to stop and ask a human, and who
9. DEFINITION OF DONE: the observable end state
10. AUTOMATION CANDIDATES: which steps could be automated, and roughly how

Write for someone who has never done this. No assumed knowledge. No steps that combine two actions.

32. Process Automation Audit

Use when: you suspect you are burning hours on work a machine should do.

You are an automation consultant. Find what I should stop doing manually.

MY BUSINESS: [WHAT YOU DO]

TEAM SIZE: [NUMBER]

MY WEEK: [LIST EVERY RECURRING TASK YOU OR YOUR TEAM DOES, WITH ROUGH HOURS PER WEEK]

TOOLS I ALREADY PAY FOR: [LIST]

MY TECHNICAL LEVEL: [NO-CODE ONLY / SOME SCRIPTING / DEVELOPER]

Produce:

1. A TABLE: task / hours per week / repeatability / rules-based or judgment-based / automation difficulty (low, medium, high)
2. THE TOP 5 AUTOMATION CANDIDATES, ranked by (hours saved) divided by (effort to build)
3. For each of the top 5:
 - The trigger, the steps, and the output
 - Which of my existing tools can do it
 - What breaks if it fails silently, and the guardrail to prevent that
 - A realistic build estimate in hours
4. THE DO-NOT-AUTOMATE LIST: tasks where automation would cost more than it saves or would damage quality
5. THE FIRST ONE TO BUILD, with a concrete week-one plan

Rules: prefer tools I already pay for over new subscriptions. Be honest about maintenance cost. Do not recommend automating something that should just be eliminated – flag those separately.

33. Client Onboarding System

Use when: every new client start feels improvised and something always gets missed.

You are a client operations designer.

MY SERVICE: [WHAT YOU DELIVER]

ENGAGEMENT LENGTH: [DURATION]

WHAT I NEED FROM CLIENTS TO START: [ACCESS, ASSETS, DECISIONS, INFO]

WHERE ONBOARDING CURRENTLY BREAKS: [BE HONEST]

MY TOOLS: [CRM, PROJECT TOOL, COMMS, ETC.]

Design a complete onboarding system:

1. TIMELINE: day 0 to day 14, what happens each day, who does it
2. WELCOME EMAIL: full copy, sets expectations and reduces anxiety
3. INTAKE FORM: every question I should ask, grouped, with a note on why each matters
4. KICKOFF CALL AGENDA: 45 minutes, block by block, with the outcomes each block must produce
5. ACCESS CHECKLIST: everything I need, with the exact request wording for each
6. CLIENT-SIDE CHECKLIST: what they must do, with deadlines
7. THE FIRST WIN: what to deliver in week one to build confidence, and why that one
8. COMMUNICATION CONTRACT: channels, response times, meeting cadence, escalation
9. FIX FOR MY BREAK POINT: address the specific problem I named, directly

Everything must be copy-paste ready. No placeholder text like "insert details here" unless the detail is genuinely mine to supply.

34. Meeting Agenda And Decision Framing

Use when: a meeting needs to produce a decision, not a discussion.

You are a meeting facilitator who hates wasted meetings.

MEETING PURPOSE: [WHAT IT IS FOR]

ATTENDEES AND ROLES: [WHO IS THERE AND WHY]

DURATION: [MINUTES]

THE DECISION THAT MUST BE MADE: [OR "NO DECISION, INFORMATION ONLY"]

BACKGROUND: [WHAT PEOPLE NEED TO KNOW]

KNOWN DISAGREEMENTS: [WHERE PEOPLE ARE SPLIT]

Produce:

1. THE ONE-LINE PURPOSE to put at the top of the invite
2. PRE-READ: what attendees must read or prepare, with the time it takes
3. AGENDA: block by block with minutes, the question each block answers, and who leads
4. THE DECISION FRAME: the options on the table, the criteria for choosing, and who has the final call
5. FACILITATION SCRIPT: how to open, how to cut a tangent, how to force a decision at the 5-minute warning
6. HANDLING THE DISAGREEMENT I NAMED: a specific approach
7. OUTPUT TEMPLATE: decisions made, owners, dates, open questions
8. THE HONEST CHECK: whether this meeting is necessary at all, or could be an async document – answer directly

Cut anything ceremonial. No round-the-room status updates unless they change a decision.

35. Inbox Triage And Reply Drafting

Use when: your inbox is a backlog and you need to clear it in one sitting.

You are my executive assistant. Triage these emails.

MY ROLE: [WHAT YOU DO]

MY PRIORITIES THIS WEEK: [TOP 3]

MY REPLY STYLE: [E.G. SHORT, DIRECT, FRIENDLY, NO SMALL TALK]

EMAILS:

[PASTE EACH EMAIL WITH SENDER AND SUBJECT, SEPARATED BY ---]

For each email output:

FROM / SUBJECT

CATEGORY: reply now / reply later / delegate / archive / needs my decision

WHY: one line

IF REPLY: a complete draft in my style, ready to send

IF DELEGATE: who it should go to and the handoff message

IF DECISION: state the decision needed and the options in one line each

Then produce:

- THE ORDER I should handle them in
- ANYTHING TIME-SENSITIVE I might miss
- A LIST of anything that looks like it needs information I have not given you

Rules: never commit me to a deadline, price, or meeting that is not clearly already agreed. Where a reply requires a fact I do not have, insert [CONFIRM: what you need] instead of guessing.

36. Hiring Job Description And Scorecard

Use when: you are about to hire and want to attract the right person, not the most applicants.

You are a hiring strategist for small teams.

ROLE: [TITLE]

WHY I AM HIRING: [THE ACTUAL BOTTLENECK THIS PERSON SOLVES]

WHAT THEY WILL DO IN WEEK ONE: [SPECIFIC]

WHAT SUCCESS LOOKS LIKE AT 90 DAYS: [SPECIFIC]

BUDGET: [RANGE]

WORK SETUP: [REMOTE / HYBRID / HOURS / TIMEZONE]

Produce:

1. JOB POST: title, a 3-sentence intro about the real work, "what you'll do" as 6 concrete responsibilities, "what we're looking for" as must-haves and nice-to-haves clearly separated, the honest downsides of this role, compensation, how to apply
2. THE SCREENING QUESTION: one question in the application that filters out 80 percent of poor fits
3. SCORECARD: 5 competencies, each with what "meets" and "exceeds" look like in observable behavior
4. INTERVIEW QUESTIONS: 8 behavioral questions mapped to the competencies, each with what a strong answer contains and what a red flag sounds like

5. PAID TRIAL TASK: a 2-hour task that tests the actual work, with the grading rubric
6. REFERENCE QUESTIONS: 5 that get past the polite non-answer

Rules: no "rockstar", "ninja", "wear many hats", or "fast-paced environment". State the downsides honestly – it saves both sides time.

37. Project Plan Breakdown

Use when: a project is a vague blob and you need a plan you can actually execute.

You are a project manager. Turn this into an executable plan.

PROJECT: [WHAT YOU ARE TRYING TO ACCOMPLISH]

DEADLINE: [DATE]

WHO IS AVAILABLE: [PEOPLE AND HOURS PER WEEK]

BUDGET: [AMOUNT OR "TIME ONLY"]

DEFINITION OF DONE: [WHAT MUST BE TRUE AT THE END]

CONSTRAINTS: [ANYTHING FIXED – TOOLS, APPROVALS, DEPENDENCIES]

Produce:

1. MILESTONES: 4-6, each with a date and an observable completion criterion
2. TASK BREAKDOWN: under each milestone, tasks with owner, estimate in hours, and dependencies
3. THE CRITICAL PATH: which chain of tasks determines the deadline
4. RISK REGISTER: 6 risks, each with likelihood, impact, and the specific mitigation
5. THE SEQUENCING LOGIC: why this order and not another
6. WHAT TO CUT FIRST: if we fall behind, the ranked list of what gets dropped and what must never be dropped
7. CHECK-IN RHYTHM: when to review, and the three questions each review answers
8. REALITY CHECK: given the hours available, is this deadline achievable? Answer yes or no with the math.

Do not pad estimates and do not be optimistic. If the plan does not fit the deadline, say exactly where it breaks.

38. Vendor Or Tool Evaluation

Use when: you are choosing software and do not want to regret it in six months.

You are a technology buyer who has been burned before.

WHAT I NEED IT TO DO: [THE JOB, IN CONCRETE TERMS]

CURRENT SETUP: [WHAT YOU USE NOW AND WHY IT IS FAILING]

OPTIONS I AM CONSIDERING: [LIST, OR "SUGGEST OPTIONS"]

BUDGET: [MONTHLY OR ANNUAL]

TEAM SIZE AND TECHNICAL LEVEL: [DETAILS]

MUST INTEGRATE WITH: [LIST]

Produce:

1. REQUIREMENTS: split into must-have, should-have, nice-to-have, based on what I told you
2. COMPARISON TABLE: each option against each must-have
3. THE HIDDEN COSTS to investigate for each: setup time, migration effort, per-seat scaling, add-on pricing, contract terms
4. LOCK-IN RISK: how hard it is to leave each option, and what data I would lose
5. THE FIVE QUESTIONS to ask each vendor on a demo call that they would rather not answer
6. RECOMMENDATION: one pick, three reasons, one thing that would change my mind
7. THE TRIAL PLAN: what to test in 14 days to know if the pick is right
8. THE CHEAPER ALTERNATIVE: is there a way to solve this without new software at all?

Where you are not certain about a product's current features or pricing, say so explicitly rather than stating it as fact. Tell me what to verify.

39. Difficult Client Or Team Message

Use when: you have to say something uncomfortable and want to keep the relationship.

You are a communications advisor. Help me write a hard message well.

SITUATION: [WHAT HAPPENED, INCLUDING YOUR PART IN IT]

WHO I AM WRITING TO: [RELATIONSHIP AND HOW THEY TYPICALLY REACT]

WHAT I NEED TO COMMUNICATE: [THE MESSAGE]

WHAT I WANT TO PRESERVE: [THE RELATIONSHIP / THE CONTRACT / MY BOUNDARY]

WHAT I AM WILLING TO CONCEDE: [IF ANYTHING]

MY DRAFT (IF ANY): [PASTE IT]

Produce:

1. WHAT THEY WILL FEEL when they read this, and what that means for how I open
2. THE MESSAGE, full draft: lead with the point, take responsibility where it is mine, be specific about what happens next
3. THE THREE SENTENCES TO CUT if I want it shorter
4. WHAT I SHOULD NOT SAY, and why – including anything in my draft that would escalate
5. THEIR LIKELY RESPONSES: 3 scenarios and how to reply to each
6. IF THIS IS BEST DONE ON A CALL, say so and give me the talking points instead

Rules: no passive voice hiding responsibility, no "mistakes were made", no over-apologizing that invites more blame, no defensiveness. Direct and warm at the same time.

40. Weekly Priority Reset

Use when: everything feels urgent and you need to decide what actually matters.

You are a chief of staff. Help me plan the week.

MY BIG GOAL THIS QUARTER: [ONE GOAL]

EVERYTHING ON MY PLATE: [DUMP THE FULL LIST, MESSY]

HOURS OF FOCUSED TIME AVAILABLE THIS WEEK: [NUMBER]

FIXED COMMITMENTS: [MEETINGS, DEADLINES, OBLIGATIONS]

WHAT SLIPPED LAST WEEK: [LIST]

Produce:

1. THE SORT: every item classified as moves-the-goal, keeps-the-lights-on, or noise
2. THE THREE: the three things that, if done, make this week a win. Justify each against my quarterly goal.
3. THE SCHEDULE: map the three onto my available hours, accounting for my fixed commitments
4. DELEGATE OR DELETE: what should not be done by me, or at all
5. THE SLIPPAGE DIAGNOSIS: why last week's items slipped – capacity, clarity, or avoidance – based on the pattern
6. THE ONE THING I AM AVOIDING: name it directly from the list
7. THE HONEST MATH: does the work fit the hours? If not, what has to go?

Be direct. If my list is unrealistic, say so in the first line. Do not create a plan that requires a perfect week.

Section 5: Data & Analysis

41. Spreadsheet Data Analysis

Use when: you have a export full of numbers and no idea what it is telling you.

You are a data analyst. Analyze this dataset and tell me what matters.

MY DATA (paste CSV, table, or describe columns and paste rows):

[PASTE HERE]

CONTEXT: [WHAT THIS DATA IS, HOW IT WAS COLLECTED, WHAT PERIOD IT COVERS]

THE DECISION I NEED TO MAKE: [BE SPECIFIC]

Produce:

1. DATA QUALITY CHECK: missing values, duplicates, outliers, inconsistent formats, anything suspicious. List row or field references.
2. DESCRIPTIVE SUMMARY: the key figures, with the metric and the period stated
3. THREE FINDINGS, each as: the observation, the evidence from the data, and the confidence level (high, medium, low) with a reason
4. WHAT THIS DATA CANNOT ANSWER: be explicit about the limits, including anything my decision depends on that is not here
5. CORRELATION VS CAUSATION: flag any finding I might misread as causal
6. RECOMMENDATION for my decision, with the reasoning chain spelled out
7. WHAT TO COLLECT NEXT to make this analysis stronger

Rules: every number in your output must be derivable from my data. Show your arithmetic for any figure you calculate. Do not compare to industry averages. If the sample is too small to conclude anything, say that first.

42. Metrics And KPI Definition

Use when: you track a dozen numbers and none of them change how you act.

You are an analytics strategist.

MY BUSINESS MODEL: [HOW YOU MAKE MONEY]

MY GOAL THIS QUARTER: [ONE GOAL WITH A NUMBER]

WHAT I CURRENTLY TRACK: [LIST]

WHERE MY DATA LIVES: [TOOLS]

Produce:

1. THE ONE METRIC that best represents progress toward my goal, with the reasoning
2. THE INPUT METRICS: 4-6 numbers that drive that one metric, with the causal chain drawn out
3. FOR EACH METRIC: exact definition, formula, data source, review frequency, and the action I take if it moves the wrong way
4. VANITY METRICS: which of the things I currently track should be dropped, and why each one does not change a decision
5. LEADING VS LAGGING: classify every metric, and identify which leading indicators I am missing
6. GAMING RISK: for each metric, how it could be hit while making the business worse
7. THE DASHBOARD: what a one-screen weekly view should contain, in order

Rules: no metric survives unless there is a specific action attached to it moving. Do not suggest benchmarks or target numbers – I will set those.

43. Survey And Feedback Synthesis

Use when: you have a pile of open-text responses and need the signal.

You are a qualitative researcher.

RESPONSES:

[PASTE ALL RESPONSES, ONE PER LINE OR SEPARATED BY ---]

WHAT I ASKED: [THE QUESTION OR QUESTIONS]

WHO RESPONDED: [WHO THEY ARE AND HOW THEY WERE SELECTED]

WHAT I WANT TO LEARN: [YOUR RESEARCH QUESTION]

Produce:

1. THEMES: the distinct themes present, each with the number of responses that mention it and 2 verbatim quotes
2. THE INTENSITY READ: which themes are mentioned most often versus which are expressed most strongly – these are often different
3. SEGMENT DIFFERENCES: if respondents differ in any way I described, note where their answers diverge
4. THE UNPROMPTED SIGNALS: things people brought up that I did not ask about
5. CONTRADICTIONS: where responses conflict, stated plainly rather than averaged away
6. SELECTION BIAS: who is missing from this sample and how that skews the read

7. THREE ACTIONS this feedback supports, and one action it does NOT support that I might be tempted to take

Rules: quote verbatim, never paraphrase into a quote. Do not exaggerate consensus. If a theme has 2 mentions, say 2 – do not call it "many respondents".

44. Funnel Diagnosis

Use when: leads come in, sales do not, and you need to find the leak.

You are a conversion analyst.

MY FUNNEL, stage by stage with the numbers for [TIME PERIOD]:

[E.G. VISITORS: X / LEADS: X / CALLS BOOKED: X / CALLS HELD: X / PROPOSALS: X / CLOSED: X]

TRAFFIC SOURCE MIX: [WHERE THE TOP OF FUNNEL COMES FROM]

AVERAGE DEAL VALUE: [AMOUNT]

WHAT I CHANGED RECENTLY: [ANY CHANGES IN THIS PERIOD]

Produce:

1. STAGE CONVERSION RATES, each calculated and shown
2. THE BOTTLENECK: the single stage where fixing conversion produces the largest revenue gain, with the math
3. IMPACT MODEL: if the bottleneck improves by 10, 25, and 50 percent, what happens to revenue – show the calculation
4. FIVE HYPOTHESES for why the bottleneck stage underperforms, ranked by likelihood given what I told you
5. THE DIAGNOSTIC: for each hypothesis, the cheapest way to test whether it is true
6. QUICK WINS: two changes I could make this week
7. MEASUREMENT GAPS: what I am not tracking that I would need to solve this properly

Use only my numbers. No benchmark comparisons. Flag any stage where my numbers look internally inconsistent.

45. Cohort And Retention Read

Use when: growth looks fine on the surface and you suspect churn is eating it.

You are a retention analyst.

MY DATA: [PASTE COHORT TABLE, OR CUSTOMER LIST WITH SIGNUP DATE, CHURN DATE, AND VALUE]

BUSINESS MODEL: [SUBSCRIPTION / RETAINER / REPEAT PURCHASE]

WHAT I CONSIDER CHURN: [YOUR DEFINITION]

WHAT CHANGED OVER THIS PERIOD: [PRICING, PRODUCT, ONBOARDING, MARKETING CHANGES WITH DATES]

Produce:

1. RETENTION BY COHORT: the curve for each cohort, with the numbers
2. WHERE THE DROP HAPPENS: the specific period with the steepest decline

3. COHORT COMPARISON: are newer cohorts retaining better or worse, and by how much
4. CHANGE CORRELATION: line up my listed changes against cohort performance, and state clearly which correlations are suggestive versus meaningless
5. REVENUE IMPACT: what a 5-point retention improvement is worth, with the math
6. FIVE QUESTIONS to ask churned customers, designed to get past "it wasn't a fit"
7. THE LIMITS: what this data cannot tell me about why people leave

Do not assert causation from timing alone. If cohort sizes are too small for a conclusion, say which ones and stop there.

46. Financial Scenario Model

Use when: you are about to make a spending decision and want the downside in writing.

You are a financial analyst for small businesses. Model this decision.

THE DECISION: [WHAT YOU ARE CONSIDERING, E.G. HIRING, NEW TOOL, AD SPEND INCREASE]

COST: [UPFRONT AND ONGOING]

CURRENT MONTHLY REVENUE: [AMOUNT]

CURRENT MONTHLY COSTS: [AMOUNT]

CASH ON HAND: [AMOUNT]

EXPECTED BENEFIT: [WHAT YOU THINK IT PRODUCES AND WHY YOU THINK SO]

TIME TO SEE RESULTS: [YOUR ESTIMATE]

Produce:

1. THE ASSUMPTIONS list, extracted from what I told you, each labeled as (given) or (estimated by me)
2. THREE SCENARIOS over 12 months – pessimistic, expected, optimistic – as a month-by-month table of revenue, costs, and cash position
3. BREAK-EVEN: the month the decision pays for itself in each scenario
4. THE CASH FLOOR: the lowest cash position reached, and in which month
5. SENSITIVITY: which single assumption, if wrong, breaks the plan
6. THE KILL CRITERIA: the specific number and date at which I should reverse this decision
7. RECOMMENDATION: go, no-go, or go-with-conditions, stated plainly

Show every calculation. Use only my numbers and clearly labeled estimates derived from them. Do not import industry growth rates or benchmarks.

47. Report To Plain English

Use when: someone sent you a dense analytics report and you need the point.

You are a translator between analysts and decision makers.

THE REPORT:

[PASTE THE FULL REPORT, TABLE, OR DASHBOARD EXPORT]

MY ROLE: [WHAT YOU DO]

WHAT I NEED TO DECIDE OR REPORT ON: [YOUR PURPOSE]

Produce:

1. THE HEADLINE: what this report says, in one sentence a non-analyst understands
2. THE THREE NUMBERS THAT MATTER for my purpose, each with what it means in plain language and whether it is good or bad
3. WHAT CHANGED and by how much, versus what stayed flat
4. THE JARGON DECODER: every technical term in the report, defined in one line
5. WHAT THE REPORT IS NOT SAYING: claims it stops short of making, and gaps in what it covers
6. QUESTIONS TO ASK the person who produced it: 5 that would sharpen the picture
7. THE ACTION: what I should actually do based on this, or "nothing yet, because..."

Rules: only interpret what is in the report. If a number is ambiguous or the methodology is unclear, flag it rather than assuming. No jargon in your own writing.

48. A/B Test Design And Read

Use when: you want to test something properly instead of guessing at a winner.

You are an experimentation specialist.

WHAT I WANT TO TEST: [THE CHANGE]

WHERE: [PAGE, EMAIL, AD, FLOW]

MY HYPOTHESIS: [WHAT YOU THINK WILL HAPPEN AND WHY]

CURRENT PERFORMANCE: [BASELINE NUMBER AND VOLUME PER WEEK]

HOW LONG I CAN RUN IT: [DURATION]

PART A – DESIGN:

1. Restate my hypothesis in testable form: if [change], then [metric] will [direction], because [mechanism]
2. THE PRIMARY METRIC and two guardrail metrics that must not get worse
3. VARIANT SPEC: exactly what changes and what stays identical
4. SAMPLE SIZE: given my volume, how long until the result means anything – show the reasoning
5. IS THIS TEST WORTH RUNNING? If my volume cannot produce a readable result, say so and suggest what to do instead
6. WHAT WOULD MAKE ME ACT on each possible outcome, decided before the test runs

PART B – after the test, I will paste results here: [RESULTS]

Then: state the outcome, whether it is conclusive, what could confound it, and what to do next. Do not declare a winner on a difference the sample cannot support.

49. Customer Segmentation From Records

Use when: you treat all customers the same and suspect you should not.

You are a customer analytics consultant.

MY CUSTOMER DATA: [PASTE A TABLE – INCLUDE WHATEVER YOU HAVE: INDUSTRY, SIZE, ACQUISITION SOURCE, REVENUE, TENURE, SERVICES USED, SUPPORT LOAD]

MY SERVICES: [WHAT YOU OFFER]

WHAT I WANT TO DO WITH THE SEGMENTS: [PRICING / MARKETING / SERVICE DESIGN]

Produce:

1. THE SEGMENTS: 3-5 groups, each defined by the criteria that create it, with the count and share of revenue
2. SEGMENT PROFILES: for each, the typical customer, what they buy, what they cost to serve, and their value
3. THE BEST SEGMENT: highest value relative to cost to serve, with the numbers
4. THE PROBLEM SEGMENT: high effort, low return – name it plainly and say what to do about it
5. CONCENTRATION RISK: how much revenue sits with too few customers
6. WHAT CHANGES PER SEGMENT: different messaging, pricing, or service level, specifically
7. THE ONE SEGMENT TO GO AFTER for growth, and the reasoning

Base segments only on the fields I provided. If a field is missing that would make segmentation much better, name it. Do not invent segment names that imply data I do not have.

50. Data Cleaning And Structuring

Use when: your list is a mess of inconsistent formats and duplicates before you can use it.

You are a data operations specialist. Clean and structure this data.

RAW DATA:

[PASTE IT – MESSY IS EXPECTED]

WHAT I WILL USE IT FOR: [E.G. IMPORT INTO CRM, EMAIL CAMPAIGN, REPORTING]

REQUIRED OUTPUT FIELDS: [LIST THE COLUMNS YOU NEED]

FORMATTING RULES: [E.G. NAMES IN TITLE CASE, PHONE IN E.164, DATES AS YYYY-MM-DD]

Produce:

1. THE ISSUES FOUND: duplicates, inconsistent casing, mixed formats, missing required fields, likely typos, invalid entries – each with counts
2. THE CLEANED DATA as a table with my required fields, following my formatting rules
3. THE REJECTED ROWS in a separate list, each with the reason it was rejected
4. THE UNCERTAIN ROWS: anything you had to guess about, flagged for my review with the guess and the alternative
5. THE RULE SET: the exact transformation rules you applied, written so I could reproduce them
6. PREVENTION: what to change at the point of collection so this data comes in clean next time

Rules: never fabricate a missing value. Never merge two records unless the match is unambiguous – if in doubt, flag it. Preserve original values in a note column where you changed something significant.

51. Ask Better Questions Of Any Dataset

Use when: you have data but do not know what to ask it.

You are an analyst who is good at framing the right question before running any analysis.

WHAT DATA I HAVE ACCESS TO: [LIST THE SOURCES AND THE FIELDS IN EACH]

MY BUSINESS: [WHAT YOU DO]

DECISIONS I MAKE REGULARLY: [LIST 3-5]

WHAT I FEEL UNCERTAIN ABOUT: [YOUR GUT SENSE OF WHAT YOU DO NOT KNOW]

Produce:

1. TWENTY QUESTIONS my data could answer, grouped by the decision each one supports
2. FOR EACH: the fields required, the analysis method in one line, and how the answer would change what I do
3. THE ANSWERABLE FIVE: the questions with the highest value that my current data can actually answer today
4. THE UNANSWERABLE ONES: questions worth asking that my data cannot support, and exactly what I would need to collect
5. THE TRAP QUESTIONS: 3 questions that feel important but whose answers would not change any decision
6. THE STARTING POINT: which single question to answer first and why

Be honest about what my fields can and cannot support. Do not suggest an analysis that requires data I did not list.

52. Assumption Stress Test

Use when: you are about to bet real money or months on a belief.

You are a critical analyst. Your job is to find where my thinking breaks, not to encourage me.

WHAT I BELIEVE: [THE ASSUMPTION OR PLAN]

WHY I BELIEVE IT: [YOUR EVIDENCE AND REASONING]

WHAT I AM ABOUT TO DO ABOUT IT: [THE COMMITMENT – MONEY, TIME, OR BOTH]

WHAT WOULD HAPPEN IF I AM WRONG: [YOUR ASSESSMENT]

Produce:

1. ASSUMPTION MAP: every assumption my belief depends on, including the ones I did not state
2. LOAD-BEARING vs INCIDENTAL: which assumptions, if false, collapse the whole thing
3. EVIDENCE AUDIT: for each load-bearing assumption – is my evidence direct, anecdotal, or absent?
4. THE STRONGEST COUNTERARGUMENT, written as well as someone who genuinely disagrees would write it
5. DISCONFIRMING EVIDENCE: what I would expect to see if I were wrong, and whether I have checked for it
6. THE CHEAPEST TEST: how to test the most load-bearing assumption before making the full commitment
7. THE VERDICT: proceed, proceed with a smaller bet, or stop – and what specifically would change your answer

Do not soften your assessment. If my reasoning is sound, say so briefly and move on. Do not invent counter-evidence – if you do not know, frame it as a question I should answer.

Now Go Use Them

Pick one prompt. Fill in the brackets with your real details. Run it today. That single action beats reading this document twice.

The prompts do not make you good at marketing, sales, or operations. They remove the blank page. What you feed in still decides what comes out. Better inputs, better outputs. Always.

If you want these wired into systems that run without you — CRM automations, lead generation workflows, cold email infrastructure, AI-assisted operations — that is the work I do.
